DETAILED ACTION

EXAMINER'S AMENDMENT

1. An examiner's amendment to the record appears below. Should the changes and/or additions be unacceptable to applicant, an amendment may be filed as provided by 37 CFR 1.312. To ensure consideration of such an amendment, it MUST be submitted no later than the payment of the issue fee.

Authorization for this examiner's amendment was given in a telephone interview with Bill Powell (Reg. No. 39,803) on October 25, 2006.

The application has been amended as follows:

- Claim 9 has been replaced with the following:

9. A system for quantifying compounds in fluids, gases, vapors, and solids, the system comprising:

a disc drive for supporting and rotating an optical disc, said optical disc including a ~~substrate layer and at least one~~ highly reproducible sensor array for producing a prerecorded standard response, said sensor array including a plurality of sensor spots, each sensor spot being responsive to a compound;

a light source ~~positioned~~ for directing light onto ~~the~~ at least one sensor spot ~~without first directing the light onto the substrate layer;~~

at least one optical pickup for detecting light transmitted through the at least one sensor spot, the transmitted light being indicative of a concentration of a compound; and

an analog-to-digital converter for quantifying an intensity of the transmitted light.

Art Unit: 2877

- Claim 13 has been canceled.
- Claim 14 has been replaced by the following:

14. The system as in claim ~~13~~ 9, further comprising a processor for comparing measured intensity of the transmitted light to the prerecorded standard response.

- The following claim 44 has been added.

44. The system as in claim 9, wherein each of said plurality of sensor spots is responsive to a different compound.

Allowable Subject Matter

2. Claims 9-12, 14-21, & 44 are allowed over prior art of record.

The following is a statement of reasons for the indication of allowable subject matter:

Regarding claim 9, the prior art fails to disclose or make obvious “a highly reproducible sensor array for producing a prerecorded standard response, said sensor array including a plurality of sensor spots, each sensor spot being responsive to a compound” and in combination with the other recited limitations of claim 9. Claims 10-12, 14-21, & 44 are allowed by virtue of dependency on the allowed claim 9.

Any comments considered necessary by applicant must be submitted no later than the payment of the issue fee and, to avoid processing delays, should preferably accompany the issue fee. Such submissions should be clearly labeled “Comments on Statement of Reasons for Allowance.”
